

LED Setup Haus Ungarn

The LED screens can be used to show

- pictures / photos
- videos / movies
- präsentations / powerpoint (from your laptop)
- text / schedules

The led-wall is very flexible and can be used as part of a keynote, displaying text and pictures. Also it can be used as animated background for displaying logos or incentive-photos.

Display 4 (maybe also 5) will show your präsentation. (format 16:9 / HDMI signal from your computer).

Your signal can be 1280 x 720px or 1920 x 1080px but will be scaled down to a resolution of 648 x 384px. (please don't use small text)

Display 1 is located next to the door that leads to the cinema. This is optimal for displaying schedules or other constant information.

please deliver Logos and Graphics as vector (ai, eps, pdf) good quality jpg or png.

Videos can be mov, avi or mp4 (no wmv)

All files should be delivered 1 week before the event. Please include the event name and date into the email subject.

If you have questions or need inspiration feel free to call us or the VJ directly
